Description

Ground Floor Apartment – Traditional Stone House, Platsa Village

€80,000

Platsa is one of those Mani villages that has remained largely unchanged – a genuine hill-top settlement with a working plateia, stone houses that have stood for centuries, and a pace of life that feels a world away from the coast below. It is one of the most authentic and well-loved villages in Western Mani, with a character that draws people back year after year.

This ground floor apartment sits right on the main square, at the heart of village life. The building is a traditional stone house in the true Mani style, and the apartment comprises a living room, bedroom, kitchen, and bath-

room. It needs full renovation, but once done it offers something genuinely low maintenance – a solid stone base in a village that takes care of itself.

The village has its own taverna, with further great options nearby in Cambinari, Nomitsi and Platanos. Shops and services are available in Agios Nikolaos, and the beautiful Pantazi beach is just a ten minute drive away.

A straightforward opportunity to own a piece of real Mani – without the upkeep demands of a larger property.

In brief:

Ground floor apartment · Traditional stone house · Main plateia, Platsa · Living room, bedroom, kitchen, bathroom · Full renovation required · €80,000
